

## How to Customize Your Default PMPi Selection

The PMP InterConnect allows DC PDMP users to view data collected in other states and jurisdictions. Follow the steps below to set your default PMPi settings to include the states you check most frequently.

1. Login into the DC PDMP: <https://districtofcolumbia.pmpaware.net/login>
2. Click on your name in the top right corner. Select “Default PMPi States”.

The screenshot displays the DC PDMP user interface. At the top, a dark blue navigation bar contains a 'Menu' icon and the text 'Your Name Here' with a dropdown arrow. The dropdown menu is open, showing options: 'My Profile', 'Default PMPi States' (highlighted in red), 'Delegate Management', 'Password Reset', and 'Log Out' (in a red button). Below the navigation bar, the breadcrumb 'Home > Dashboard' is visible. The main content area is titled 'My Dashboard' and includes a 'Recent Requests' section with a 'View Requests History' link. To the right, there are sections for 'My Favorites' (showing 'RxSearch - Patient Request'), 'PMP Announcements' (showing 'No Announcements Available'), and 'Quick Links' (showing 'DC PDMP'). The footer contains the 'Powered By' logos for 'PMP Aware' and 'APPRISS HEALTH', and the text 'DC PDMP District of Columbia PDMP'.

3. Select the states that you would like to be automatically selected when you initiate a patient query. You may select as many or as few as you wish. Please note that selecting more states for PMPi may cause the query to take longer.
4. Click “Update Default”.

### Default InterConnect PMPs

- ☐ Alabama
- ☐ Connecticut
- ☒ Delaware
- ☐ Georgia
- ☐ Indiana
- ☐ Iowa
- ☒ Maryland Disclosures
- ☒ Maryland Requests
- ☐ Massachusetts
- ☐ Minnesota
- ☐ New York
- ☐ North Carolina
- ☐ North Dakota
- ☒ Pennsylvania
- ☐ Rhode Island
